

Summary Notation: ArchiMate 3 Implementation

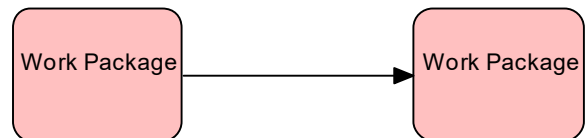

Notation based on The Open Group ArchiMate 3.0 Specification

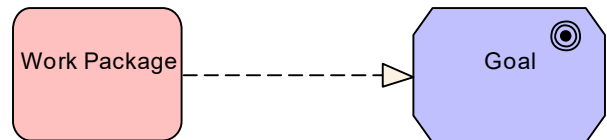

A **Work Package** represents a programme, project or task. Each has a well defined start and end date and well-defined set of goals.

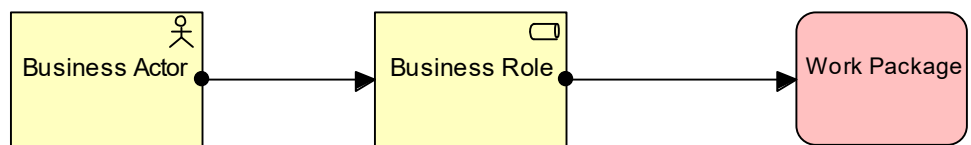

A work package is an **aggregate** that contains 1 or more detailed work packages.

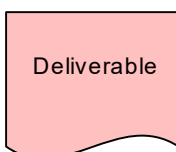

A work package **triggers** the next work package.

A work package **realizes** a goal.

A business actor and business role is **assigned** to implement a work package.

A **Deliverable** represents a precisely defined outcome of a work package.

A work package **realizes** one or more deliverables.
